# Case Studies

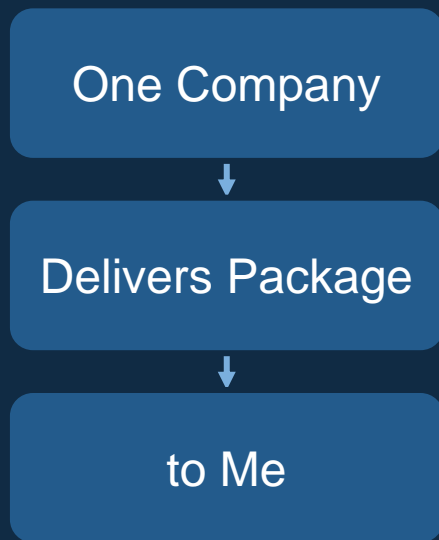

The World's Leading Retailer

## Customer Obsession...

*I want my package!*

## Service Design to Handle Every Contingency...

# The global parcel delivery & logistics carriers vs. the digital first disrupters...

There's travel disruption with storms in the South China Sea... what do I do?

Reward my loyalty!

Don't send me another email... I get 200 a day!

How do I coordinate for other members of my family?

I need pricing for air & sea options from Dhaka to to my store in Cali

# The Five Critical Enablers Vital For Success

# 1. Design with the customer at the center

## 2. Map internal processes & capabilities to the future customer journey

### 3. Rapidly design, develop, launch, and learn

## 4. Leverage the data that's available

## 5. Personalize... one step at a time

## Why These Things Matter

### Proactive Communication is *Everything*

When it's time to push back ... something happens  
When it's waiting on a delivery ... weather happens  
When it's the big game ... outages happen

***You will not deliver 100% of the time.***

**Communicating effectively in these moments will  
keep customers coming back.**

# A methodic way for approaching these transformations

## Sutherland's Experience-Led Disruption Approach

### 1. Ambition

Starting Point, North Star,  
Strategic Alignment, Target  
Impact

### 2. Insight

Voice of Customers, Partners,  
Employees & Leading  
Practices

### 3. Design

Design all components of the  
CX future model & platform

### 4. Roadmap

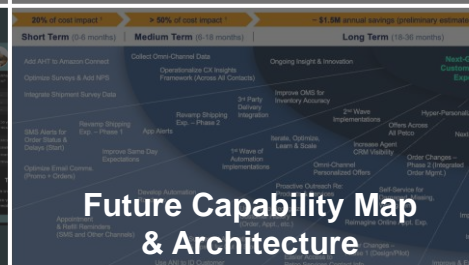

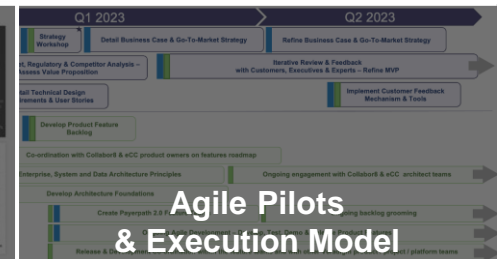

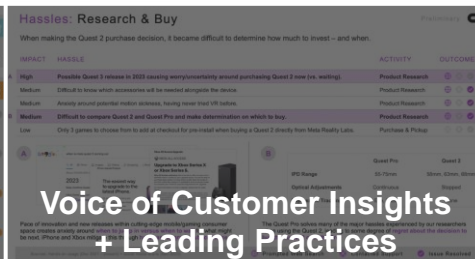

Mobilization plan to build  
& activate

### 5. Agile Implement

Agile & continuous phased  
execution  
**Micro-Innovation Cycles**

The background of the image is a view through an airplane window. The window frame is visible, and the view outside shows a sunset or sunrise with a pink and orange sky. A palm tree is silhouetted against the sky, and the tail of another airplane is visible on the tarmac below. The text "Thank You!" is overlaid in a white, cursive font.

*Thank You!*
