

PARTNERING WITH ATPCO FOR NEXT GENERATION INDUSTRY SETTLEMENT PLATFORM

June 30, 2020 - Airlines Clearing House is excited to announce we are partnering with ATPCO to build a new unified, state-of-the-art settlement services system for our members.

Through a rigorous RFP process, ATPCO was chosen to build a more efficient, modern settlement platform using leading-edge technology that will enable ACH to offer the same trusted, reliable settlement services we are known for today. The system will be cloud-hosted and take advantage of microservices architecture so it can grow and adapt as industry settlement needs change.

Why ATPCO? We are both airline-owned organizations and we have your best interests at heart. Critical processing will be kept within an industry-centric ecosystem. ATPCO has decades of experience in the complex travel industry space and technology and data security expertise we can leverage to ensure settlements are efficient, safe, and reliable.

What's next? The project is getting underway this summer and is expected to be completed in mid-2021. More details and updates to come.
